INFUSION SET

Product Name: Infusion Set With Auto Air Stop & Priming Filter - SURU INFU-NOAIR

Item Code: 2047S, 2047H

Features :

- Specially engineered auto air stop filter (15 micron) prevents the entry of air in the line when the I.V. bottle is empty
- Helps in preventing Healthcare Associated Infections (HAI)
- Use of this product ensures no more spillage of i.v. fluid on hands, floor and bedding, it also reduces wastage of i.v. fluid
- No air can get through to the patient as auto air stop filter maintains a constant fluid level, the special priming filter ensure that the line fills automatically (auto prime) thus maintaining a closed system until connected
- Product is universally suitable for gravity feed as well as for pressure infusion up to 2 bars
- Clear universal spike is compatible with all kinds of i.v. bottles
- DEHP free infusion lines softened with non phthalate plasticizer reduces phthalate related toxicity ensuring greater patient safety
- Unique designed ring in drip chamber helps in secure gripping
- PVC free flexible drip chamber for easy and fast priming (drop rate 20 drops / mL)

Available configuration :

- Available with “Y” injection port (latex free) design for intermittent medications
- Standard tube length: 180 cm (possible to provide customized tube length)
- Available with soft and hard chamber
