

SURU INTERNATIONAL PVT. LTD.

ENDOTRACHEAL TUBE

Product Name: Endotracheal Tube - SURUNTREK ®

Item Code: 3056P, 3056C

Features :

Endotracheal tubes designed to establish and maintain an airway in seconds in emergency situations

Common features

- Used to provide direct and unimpeded airway to and from lungs
- Made from special non toxic, clear, thermo sensitive siliconised PVC material to protect delicate mucosal tissue & allow confirmation of tube placement due to condensation of the expired gases
- Smooth tip aids traumatic intubations
- Full length radio-opaque line to assess exact location of tube
- 1 cm graduation markings to ascertain insertion depth
- 2 cm indicator mark assists positioning of tube past the vocal cord
- Endotracheal tubes are made of implant tested PVC (polyvinyl chloride)
- Latex free
- Also available with REINFORCED ENDOTRACHEAL TUBE (Item Code # 3057P, 3057C)
- Sterile product for single use

Endotracheal tube with cuff :

- Pilot balloon with integral one way valve
- Size of tube also clearly marked on the pilot balloon
- The cuff is optimally designed for routine intubation
- Endotracheal tube murphy eye, high volume, low pressure cuff, oral / nasal
- Pilot balloon indicates intracuff pressure and is clearly marked with tube size for immediate identification
