CENTRAL VENOUS CATHETER KITS

Product Name: Central Venous Catheter with Antimicrobial Coated

Item Code: 3061C, 3062C, 3063C

Features:

- A central venous catheter is a long, thin, flexible tube used for intensive infusion and / or transfusion therapy, invasive central venous pressure measurement and for blood collection
- Specially designed soft & beveled tip for smooth & easy insertion
- Sufficiently radio-opaque material of catheter with clear, definite marking facilitates correct placement of catheter tip
- Catheter with single or double or triple or quadruple lumens in various lengths
- The antimicrobial effect is durable and stable as Rifampicin and Minocycline integrates with the catheter molecular and they release at a slow and steady rate for a longer time
- Compared with first generation of Chlorhexidine - Silver Sulfadiazine, combination of Rifampicin - Minocycline has stronger antimicrobial effect without allergy to the patient.
- Use of this catheter reduces the changes of infection as it prolongs the indwelling time (for 30 days).
- Use of this catheter reduces the frequency of changing the catheter which helps in reducing the risk of infection.
- Soft flexible J tip guide wire prevents the vessel perforation and also provide good torque to ensure firm insertion
- The produce is individually packed in tray and sterilised by ethylene oxide

CVC Kit consists of :

- Indwelling catheter with Extension line
- Catheter holder with Clamp & Scalpel Blade
- Injection stopper
- Y Type Introducer Needle
- Guide wire with Advancer
- 5 mL Luer Lock Syringe
- Vessel Dilator

Optinal :

- Three way stopcock
- Needle Free Connector
- 5 mL Guiding Syringe with Straight Introducer Needle
- Fixator Devices

Available Sizes : FR 2, 3, 4, 4.5, 5, 5.5, 6, 7, 8, 8.5

Catheter Length : 50, 80, 100, 130, 150, 160, 200, 300 mm
